Changing of Picture

Nothing in HMM has changed after changing. HMM should update pictures of the album after changing of picture, because when not, then I don't see any response to my action.

HMM has created cover.jpg file. Can this be changed? I do not need dupplicate files, it should use another picture, but not create new one.
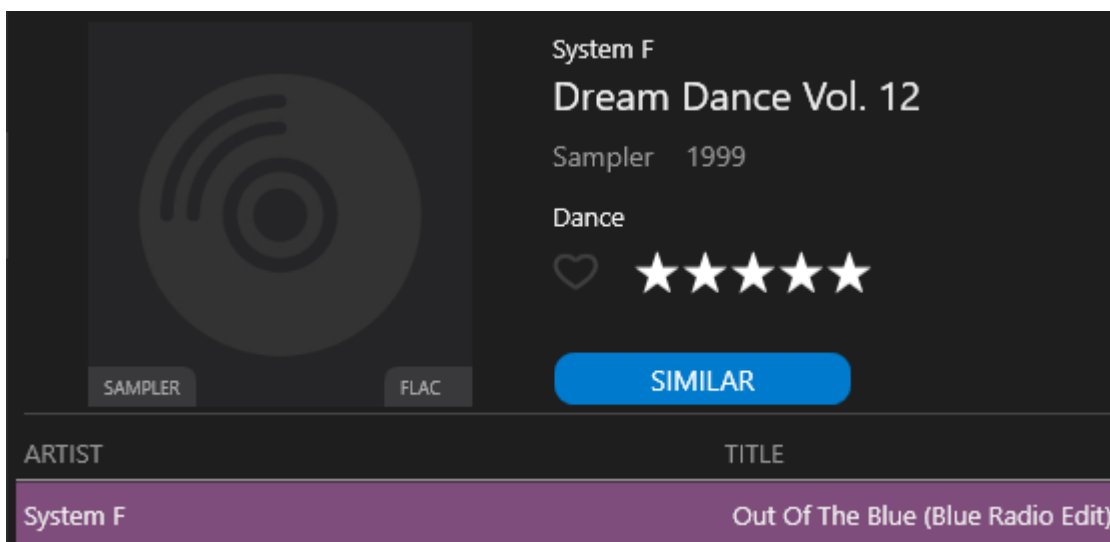

Now let's Stop and Play the song again in player:

Only one Image has changed. :-/

Let's restart HMM, maybe another will be correct then. May be cache or another problems.

Restart did not help for album view:

And now let's play the song:

Still only one use of album is displaying correct cover.

When the album has a cover at adding, then all dummy images will contain added picture and in „Now Playing" will be the new picture.
